

**Transponders to become compulsory in 2010.**

Following is a summary of the Memo from the NSW AKA executive regarding the pricing of Personal Transponders which are to become compulsory next year (2010).

LKC will be rolling out the timing system early in the new year to accommodate the transponders.

Transponders will be available to be purchased from the club from January, with further details to be supplied later.

Please note that the Tag Transponders are cheaper as they do not require the internal battery supply and charger.
